

EMERALD MS TOWN HALL MEETING

Emerald Notes:

Parents want students to spend more time on task with/guided directly by teachers.

Though still worried about safety, parents want their children in school full time.

Parent was the school/teachers to do more outreach...they feel like they have to figure it all out on their own and wish teachers would reach out more to inform/support. They also report that teacher need to schedule meetings with their students and check for understanding because they believe their students are uncomfortable seeking teachers out during office hours in current model.
