

# 2021 COVID-19 School Guidance Checklist

## Supporting Documentation

Jan 25, 2021 (Revised Mar 22, 2021)

---

### Stable group structures (where applicable):

How students and staff will be kept in stable groups with fixed membership that stay together for all activities (e.g., instruction, lunch, recess) and minimize/avoid contact with other groups or individuals who are not part of the stable group.

Students will be programmed into stable groups to insure that:

- Students stay in the same stable group

- Stable group sizes determined by the maximum capacity for students in the stable groups learning space while maintaining 3-ft physical distancing or maximum space between students, including recommended use of barriers when available.

- Each stable group should be in a separate room and not mix with other stable groups

- Teachers should remain primarily with one stable group of students, if feasible

- Contact tracing can be effectively implemented

*How many students and staff will be in each planned stable, group structure? (If planning more than one type of group, what is the minimum and maximum number of students and staff in the groups?)*

Stable group sizes will vary, but conform to the 3-ft. minimum physical distancing requirements. Some factors that determine stable group sizes include physical classroom size, layout and student need.

In grades 6-8, students are not in a single stable group, however contract tracing of students based on their schedules can be effectively implemented.

*If you have departmentalized classes, how will you organize staff and students in stable groups?*

In order to implement effective hand sanitizing procedures, we:

Stock cleaning supplies hand sanitizer and wipes for each stable group/classroom and make them visible and well identified

Signage in classrooms and offices remind students and staff on proper hand sanitizing procedures

Every student is provided with hand sanitizer upon entry into the bus.
